The image shows a smartphone screen with a registration form. The form has a yellow background and is titled 'Start Date' with a placeholder 'dd/mm/yyyy'. Below this is 'End Date' with the same placeholder. The next field is 'Number of Subjects you have this time' with a placeholder '_____'. This is followed by 'Number of times Exams happen' with a placeholder '_____'. The final field is 'Number of Hours you can Study Daily (choose wisely)' with a placeholder '_____'. At the bottom of the form is a green button labeled 'PROCEED'. The smartphone has a black bezel and a speaker grille at the top. The status bar at the top shows the time '11:31' and various icons.

Start Date dd/mm/yyyy

End Date dd/mm/yyyy

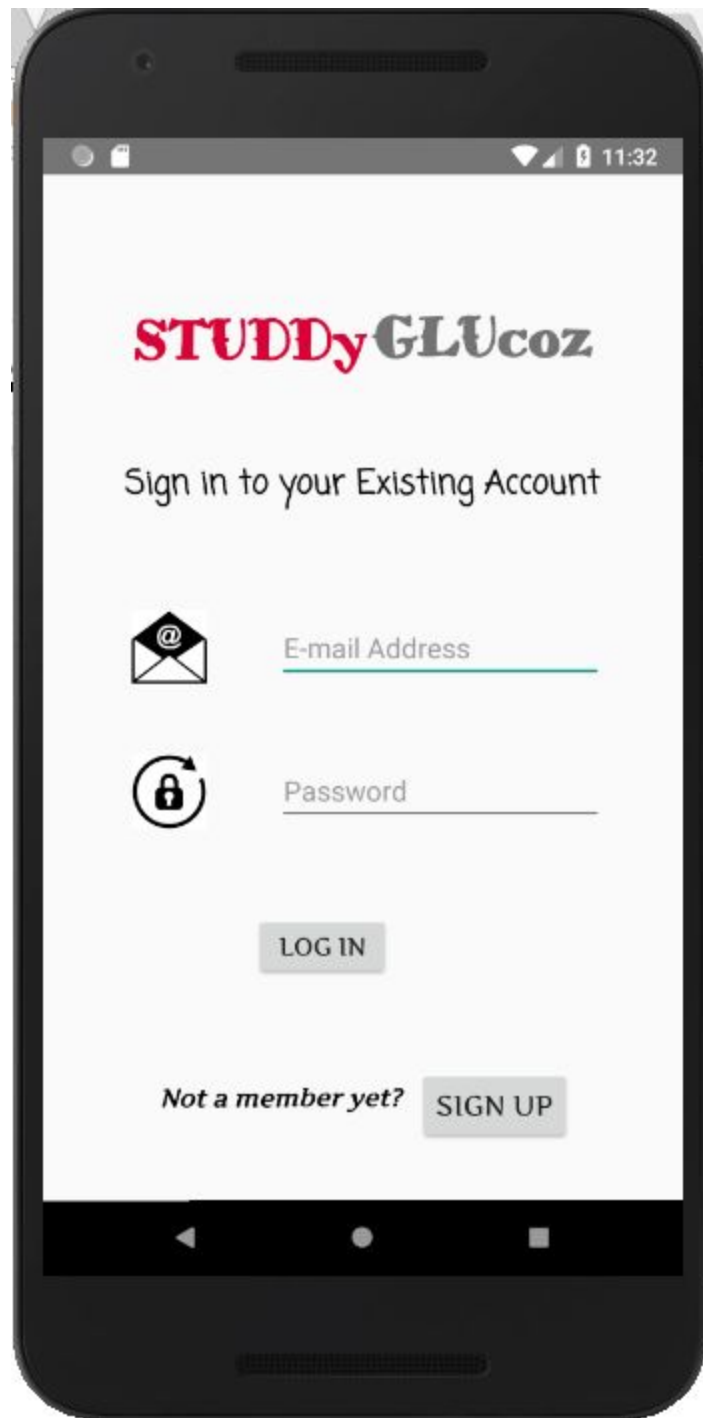

Number of Subjects you have this time _____

Number of times Exams happen _____

Number of Hours you can Study Daily
(choose wisely) _____

PROCEED

Future Goals

1. A Machine Learning Algorithm that can read the course handouts of different subjects of different colleges, and thus finds out the weightage of each topic and assigns targets accordingly.
 2. The present structure of database connects people of same course within the college. Connecting the subjects on an inter-college level will enable the students, from every tier of college, to get the best and complete knowledge out of a course.
 3. A Deep Learning Algorithm that can improve the efficiency of a student. To make this happen, the algorithm will learn from study patterns of different students from all over the world, and set targets accordingly for a student to make best out of him/her.
